

BART Station Architecture Open House

April 12, 2007 - 6:00 p.m.

The station architectural design process is well-underway on the BART to Silicon Valley Project. The City of San José and the Santa Clara Valley Transportation Authority (VTA) have completed the first phase of conceptual design for station architecture. Several rounds of stakeholder meetings have been conducted to establish a “vision” for the four BART stations in San José.

On Thursday, April 12, 2007, community members are invited to join staff from VTA and the City of San José at the BART Station Architecture Open House to view the conceptual designs of each of the four stations and offer feedback on the initial concepts.

This event will focus on the process that the City of San José, VTA and their design consultants have been through to reach two design concepts for the Berryessa, Alum Rock, Downtown San Jose and Diridon/Arena Stations. Each station has taken on an individual design, incorporating the areas’ history, the community and surrounding neighborhood attributes. Input received by the public will be presented during the next round of stakeholder meetings to further refine the design concepts of the stations. Please join us at:

San José City Hall

Room W118-119

200 East Santa Clara Street

San José, CA

on

Thursday, April 12, 6:00 - 8:00 p.m.

For further information on the BART Station Architecture Open House or process, contact Henry Servin at (408) 975-3078, City of San José Department of Transportation; or Brandi Hall at (408) 952-4297, VTA Marketing and Public Affairs Department.

We look forward to seeing you!

**Parking will be available and validated for the 6th Street underground parking garage. Transit options to Downtown San José and City Hall include VTA Rapid Bus Line 522 and Bus Line 22.*
